– Siemens is becoming Innomotics for selected motors and drives products.

Dear Sir or Madam,

Siemens is currently establishing an independent, integrated company for motors and large drives – Innomotics.

The business transition to Innomotics will take place in phases. Our Innomotics business in Germany was established on July 1, 2023; all of our further businesses in 49 countries globally are to be established by March 1, 2024 at the latest. In Poland Innomotics starts its operations on October 1, 2023. Innomotics is headquartered in Nuremberg, Germany and is a wholly-owned subsidiary of Siemens AG.

Innomotics will continue to serve you as our customer with our high ambition, passion, and outstanding products, solutions and services. Our production facilities, products, quality system and business processes (e.g., EHS, sustainability) will continue unchanged.

Along with this transition and effective January 1, 2024 (except in China), we plan to designate our products step by step as manufactured by Innomotics. However, the Siemens logo will still also be displayed on our products after that date.

Considering the above, we would like to ask you to accept Innomotics as a new supplier for low-voltage motors, geared motors, high-voltage motors, medium-voltage drives effective January 1, 2024.

Innomotics sp. z o.o.
